Research Papers

Combined retrograde and anterograde tracing of neuronal connections: Fluoro-Gold and autoradiography (NSM 00782)
R.L. Reep, M.J. Baccala, M.P. Booth and G.S. Goodwin (U.S.A.) 1

Extracellular application of cobalt: a fast and simple method for delineating invertebrate neurosecretory pathways (NSM 00777)
R.G. Chiang, K.G. Davey, J.A. Chiang, H.R. Khan and A.S.M. Saleuddin (Canada) 7

Tracing intrinsic fiber connections in postmortem human brain with WGA-HRP (NSM 00779)
S. Haber (U.S.A.) 15

Conditional cross-interval correlation analyses with applications to simultaneously recorded cerebellar Purkinje neurons (NSM 00785)
D.C. Tam, T.J. Ebner and C.K. Knox (U.S.A.) 23

An inexpensive, microcomputer-based system for recording movements in real time (NSM 00783)
T.M. Kelly and W.D. Chapple (U.S.A.) 35

A vector stimulator for neurophysiological studies of periodontal mechanosensitive units (NSM 00784)
K. Taira (Japan) 43

Preservation of the ependyma of the mouse spinal cord by various vascular perfusion procedures (NSM 00771)
R. Bjugn, H.K. Haugland and P.R. Flood (Norway) 49

A novel superfusion chamber for the measurement of endogenous glutamate release from cerebellar slices (NSM 00778)
S. Barnes, G.E. Leighton and J.A. Davies (U.K.) 57

Feasibility of continuous glutamate monitoring in perfused retinal tissue with a potentiometric biosensing probe (NSM 00780)
G.V. Diaz, L.H. El-Issa, M.A. Arnold and R.F. Miller (U.S.A.) 63

A flow rate monitor for a variety of physiological preparations, including in vitro brain slices (NSM 00781)
P.C. Rinaldi and A.M. Brown (U.S.A.) 71

A procedure for culturing rat neocortex explants in a serum-free nutrient medium (NSM 00773)
H.J. Romijn, B.M. de Jong and J.M. Ruijter (The Netherlands) 75

Mathematical means to allow computer calculation of stereotaxic settings (NSM 00775)
W.P. Ireland (Canada) 85

A method for collecting semithin epoxy serial sections for light microscopy and 3-D reconstruction (NSM 00793)
N. Wali and J.M. Jagadeesh (U.S.A.) 91

The double microscope: its use in three-dimensional reconstruction from serial sections (NSM 00787)
M. Fahle (F.R.G.) 95

Formation and degradation of 1-(ethyl)-1-(2-hydroxyethyl) aziridinium chloride in aqueous media—a comparative NMR study (NSM 00800)
S. Goldstein, R. Grimee, I. Hanin and E. Wulfert (Belgium, U.S.A.) 101

Role of the aziridinium moiety in the in vivo cholinotoxicity of ethylcholine aziridinium ion (AF64A) (NSM 00776)
H. Hörtnagl, P.E. Potter, K. Happe, S. Goldstein, S. Leventer, E. Wulfert and I. Hanin (U.S.A., Austria, Belgium) 107

A behavioral methodology for assessing non-motoric deficits in the dopamine denervated rat (NSM 00786)
R.J. Carey (U.S.A.) 115

Regional cerebral opioid receptor studies with [^{11}C]diprenorphine in normal volunteers (NSM 00789)
A.K.P. Jones, S.K. Luthra, B. Maziere, V.W. Pike, C. Loc'h, C. Crouzel, A. Syrota and T. Jones (France, U.K.) 121

Microdialysis recovery of serotonin released in spinal cord dorsal horn (NSM 00791)
L.S. Sorkin, J.L. Steinman, M.G. Hughes, W.D. Willis and D.J. McAdoo (U.S.A) 131

Data recording and playback on video tape—a multi-channel analog interface for a digital audio processor system (NSM 00788)
M. Blaettler, A. Bruegger, I.C. Forster and Y. Lehareinger (Switzerland) 139

Multisite hippocampal slice recording and stimulation using a 32 element microelectrode array (NSM 00792)
J.L. Novak and B.C. Wheeler (U.S.A.) 149

Assessment of neuromedin B polyclonal antibodies as molecular probes in neural tissue (NSM 00790)
L.H. Lazarus, B.J. Irons, L.M. Grimes, W.E. Wilson, A. Guglietta and H. Yajima (U.S.A., Japan) 161

The postmortem Alzheimer brain is a source of structurally and functionally intact astrocytic messenger RNA (NSM 00796)
E.M. Sajdel-Sulkowska, R.E. Majocha, M. Salim, S.B. Zain and C.A. Marotta (U.S.A.) 173

Corrigendum 180

Research Papers

Electron microscopic visualization of fluorescent microspheres used as a neuronal tracer (NSM 00804)
R. Egensperger and H. Holländer (F.R.G.) 181

Retrograde filling of pyramidal neurons in postmortem human cerebral cortex using horseradish peroxidase (NSM 00812)
T.G. Beach and E.G. McGeer (Canada) 187

Estimation of the numerical density of synapses in rat neocortex. Comparison of the 'disector' with an 'unfolding' method (NSM 00795)
R.K.S. Calverley, K.S. Bedi and D.G. Jones (New Zealand, U.K.) 195

A model for quantitation of peritumoral brain edema (NSM 00798)
D.E. Weissman and S.A. Grossman (U.S.A.) 207

Validation of a neocortical slice preparation for the study of epileptiform activity (NSM 00797)
J.A. Aram and D. Lodge (U.K.) 211

A diencephalic slice preparation and chamber for studying neuronal thermosensitivity (NSM 00801)
J.B. Dean and J.A. Boulant (U.S.A.) 225

A combined recording and microiontophoresis technique for input–output analysis of single neurons in the mammalian CNS (NSM 00799)
K.-M. Gottschaldt, T.P. Hicks and C. Vahle-Hinz (F.R.G.) 233

The preparation and use of antibody microprobes (NSM 00805)
A.W. Duggan, I.A. Hendry, J.L. Green, C.R. Morton and W.D. Hutchison (Australia) 241

Analysis of antibody microprobe autoradiographs by computerized image processing (NSM 00806)
I.A. Hendry, C.R. Morton and A.W. Duggan (Australia) 249

Two-dimensional jaw tracking and EMG recording system implanted in the freely moving rabbit (NSM 00807)
Y. Yamada, N. Haraguchi, K. Oi and M. Sasaki (Japan) 257
